ADAPTECONII - PROJECT8

ADAPTECONII RESEARCH FOCUS

David is studying integrated assessment tools and modeling for global sustainability. He will address structures and mechanisms governing current dynamics and directions of intended change. He will reflexively inform and be informed by the other four PhD projects in this theme ensuring their models can have synergistic impact. David will apply a pragmatic, nested and exploratory approach that connects human driving forces and economic and environmental dynamics.

EXPERIENCE

David has a background in System Dynamics and holds a joint European Master in System Dynamics (EMSD) from the University of Bergen (MPhil) and the New University of Lisbon. He also holds an MSc in Business Administration from Radboud University (Netherlands), an MSc in Political Sciences from Uppsala University and a BSc in Political Sciences with Economics as major from Uppsala University. David has worked within the associated negotiation processes at United Nations for the European Union and through the official children and youth constituency, primarily on the Sustainable Development Goals (SDGs). Before joining Stockholm Resilience Centre, David was product manager for insurance and finance at the Dept. of Ecolabelling at the Swedish Society for Nature Conservation (Naturskyddsforeningen). David was the Swedish Government's Official Youth Delegate to the United Nations High Level Political Forum on Sustainable Development in New York in 2013.

KEYWORDS

- System dynamics modelling
- Modeling
- Complex Adaptive systems
- Political economy
- Feedback economics
- Sustainable Development Goals, Agenda 2030
